

0.Data and Statistics

The burden of diabetes in the District of Columbia is furthered illustrated through statistical data collected between 1996 and 2001. Data from 1996-2000 were compiled into the “2004 District of Columbia Diabetes **Surveillance Report**” which includes a detailed analysis of diabetes prevalence, mortality, hospitalization, risk factors, and financial costs.

Included in this website is a recent 2001 update of diabetes prevalence, mortality, hospitalization and diabetes induced End Stage Renal Disease.
